

DM-531 X-Band Controller

DM-531 offers an audio cross connection between DMR Mototrbo and LTE Wave.

By use of donor radios, you can connect a talkgroup in Mototrbo to a talkgroup in Wave, where the audio is cross connected in DM-531.

The donor radios used are DP4000-serien for Mototrbo and TLK100i for Wave.

Included in the package:

- DM-531 unit
- USB charger
- DP4000 cable
- TLK100i cable
